Canterbury is a great place to visit, live, study, work and do business.

The Canterbury Mayoral Forum's Plan for Canterbury 2023-2025 summarises the interests and priorities of local government leaders for Cantabrians, focused on **three priority areas**.

Sustainable environment management

Climate change mitigation and adaptation

Shared prosperity

The Plan provides a basis for conversation and partnership with Ngāi Tahu, Government, and the business, community and volunteer sectors. Where our interests align, we can work together for the good of all.

Vision and values

Our vision for Canterbury is sustainable development with shared prosperity, resilient communities and proud identity.

All of us together We care for our natural We create shared economic resources to secure prosperity so no both present and one is left behind future opportunities We nurture caring, We celebrate our hope and kindness. diverse identities standing strong together and take pride in our to withstand and adapt to common identity challenges and change as Cantabrians

Mō tātou, ā, mō kā uri ā muri ake nei / For us and our children after us.

Priority actions

Our three immediate priorities are:

Advocating with
Government for
permanent coinvestment in flood
protection to protect
local and national
assets and contribute
to more sustainable
regional economies.

Flooding is the most common natural hazard in New Zealand, and Canterbury's 78,000km of rivers and streams puts us at substantial risk of major flooding events. Permanent co-investment in flood protection shifts the focus from disaster relief and recovery towards mitigation of flood risks, while reducing long-term costs.

Advocating with the Government for immigration and skills policies that work for Canterbury. Canterbury has many natural advantages, significant infrastructure and a range of universities and research institutes, but our GDP per person lags the national average. To lift wages and incomes we need more skilled jobs and skilled workers to fill them.

Seeking to collaborate with Government to develop an integrated approach to transport funding and increase the level of funding available for Canterbury transport networks.

Our region's vast transport network provides connection and strongly influences economic development, supporting supply chains that are critical for getting our products to market. Current funding sources do not meet present or future transport network resilience requirements. It is estimated that an additional \$1 billion is required over the next 10 years.
